WiFi Coverage+

Device configuration WiFi Coverage+

1

Place the device close to the home gateway (within 2 meters) and power it on.

2

After the device starts up, press and hold the WPS button of the device and the home gateway for 3 to 5 seconds.

NOTE: The WLAN indicator of the device blinks during the pairing.

3

After the WLAN and Internet indicators of the device turn steady green, the device is connected to the Internet.

4

Move the device to a room where you need to expand WiFi and power it on. After the Internet indicator turns steady green, WiFi is expanded successfully
